

“Bear Lake County Airport Announces Disadvantaged Business Enterprise Goal for FY2018/2019/2020 of 1.31%.”

The FAA requires that an announcement of the Disadvantaged Business Enterprise (DBE) goal be posted prior to submitting them to the FAA for their approval. The DBE notice requirements have been simplified. I have attached a copy of the goal methodology. It is not necessary to announce/solicit comments or actually post the methodology prior to submitting goals to FAA. However, if someone should ask to review the goal methodology document I would think it could be made available.

After the announcement is posted I will submit goals to FAA.

Has the DBE Program been signed off by the County Commission? Thanks.
